

## **Chapter 1 - Figures**

|                             |    |
|-----------------------------|----|
| 1-1: Joe/Jane Chiari        | 20 |
| 1-2: Symptoms               | 21 |
| 1-3: Joe/Jane Syringomyelia | 22 |

## **Chapter 2 - Figures**

|   |    |
|---|----|
| 2-1: Occipital Bone, Spine              | 31 |
| 2-2: Cerebellum, Brainstem, Spinal Cord | 32 |
| 2-3: Posterior Fossa, Foramen Magnum    | 32 |
| 2-4: Spinal Cord Regions                | 33 |
| 2-5: Bony Vertebra                      | 34 |
| 2-6: Spinal Nerves                      | 34 |
| 2-7: Meninges                           | 35 |
| 2-8: Chiari Malformation                | 38 |
| 2-9: Skull Base Dimensions              | 43 |
| 2-10: Disease Prevalence                | 47 |
| 2-11: Common Symptoms                   | 51 |
| 2-12: Symptom Definitions               | 59 |
| 2-13: Syringomyelia                     | 60 |

## **Chapter 3 - Figures**

|                                      |    |
|--------------------------------------|----|
| 3-1: Precipitating Factors           | 77 |
| 3-2: Symptom Scale                   | 78 |
| 3-3: Motor Strength Assessment Scale | 89 |
| 3-4: Reflex Grading Scale            | 91 |

## **Chapter 4 - Figures**

|   |     |
|---|-----|
| 4-1: Surgical Decision For Hypothetical Cases | 111 |
| 4-2: Surgical Preparation                     | 126 |
| 4-3: Midline Incision                         | 126 |
| 4-4: Dural Opening                            | 127 |
| 4-5: Dural Patch                              | 128 |
| 4-6: Author's Surgical Incision               | 129 |
| 4-7: Pediatric Patient In ICU                 | 129 |
| 4-8: Standard Y Dura Incision                 | 133 |
| 4-9: Expanded Dura Incision                   | 133 |
| 4-10: Surgical Techniques Used In Study       | 137 |
| 4-11: Results By Surgical Technique           | 138 |

## **Chapter 5 - Figures**

|  |            |
|--|------------|
| 5-1: Clinical Features of Post-Syrinx vs Flat Syrinx | <b>158</b> |
| 5-2: Change In Quality of Life 1 Year Post-op        | <b>164</b> |
| 5-3: Surgical Outcomes In Children Under Six         | <b>165</b> |
| 5-4: Factors Affecting Surgical Outcome              | <b>167</b> |
| 5-5: Pre and Post Disability by Flow Type            | <b>169</b> |
| 5-6: Impact of Scoliosis                             | <b>170</b> |
| 5-7: Syrinx Classification                           | <b>173</b> |
| 5-8: Compliance Index Pre and Post Surgery           | <b>179</b> |

## **Chapter 7 - Figures**

|  |            |
|--|------------|
| 7-1: Effects of Living With a Painful Neuropathic Disorder     | <b>205</b> |
| 7-2: Prevalence of Psychiatric Disorders Among Spinal Disabled | <b>207</b> |
| 7-3: Effects of Medical Driven Bankruptcies                    | <b>210</b> |
| 7-4: Common Pain Treatments Used                               | <b>213</b> |
| 7-5: Common Pain Medications Used                              | <b>214</b> |
| 7-6: Pregabalin vs Placebo                                     | <b>224</b> |

## **Chapter 8 - Figures**

|  |            |
|--|------------|
| 8-1: NIH Funding by Disease                        | <b>268</b> |
| 8-2: Pubmed CM/SM Citations by Year                | <b>269</b> |
| 8-3: Number of 2007 Citations For Various Diseases | <b>270</b> |

## **Chapter 9 - Figures**

|                          |            |
|--------------------------|------------|
| 9-1: US Chiari Community | <b>292</b> |
|--------------------------|------------|
